DELTA XML
WHERE CHANGE MATTERS

TRANSFORMING DOCUMENTATION FOR MEDICINE & HEALTHCARE

DeltaXML is helping documentation specialists in the pharmaceutical, medical and healthcare industries to transform the efficiency and accuracy of content change and merge.

TRANSFORMING DOCUMENTATION FOR MEDICINE & HEALTHCARE

WORKING WITH CHANGE IN DOCUMENTS AND REPORTS

MANAGING CHANGE AND MERGE IN HEALTHCARE AND MEDICINE

Whether you are editing commercial publications, producing regulatory reports or updating documentation for customers, DeltaXML enables your document specialists and automated systems to rapidly identify all the relevant differences between documents and their versions.

DeltaXML works within the structure of documents, including large complex texts. It is configured to filter out just those changes that are relevant to the task in hand and display them through your existing editor or content management system. It generates specially structured outputs that can be parsed and processed automatically by your workflows.

SIMPLIFYING REGULATORY CHANGE REPORTING

In sectors where safety and compliance are paramount, DeltaXML allows you to manage versioning and branching, identifying all the meaningful differences with absolute certainty.

It can generate redline reports for regulators, for customers and for internal use. DeltaXML can also generate detailed audit trails that demonstrate where changes were made throughout every one of your document processes.

SUPERCHARGING EDITING TOOLS AND WORKFLOWS

DeltaXML has been designed to integrate seamlessly into your document editors and workflows.

Its patented approach to structured content comparison means you will never miss a change or be drowned in irrelevant differences.

By integrating DeltaXML, developers and OEMs are leveraging sophisticated change and merge capabilities that have been extensively tested and proven in the most safety-critical sectors.

Follow us and never miss an update.

Try our products 14-days free within your own systems

TRIAL

Compare XML and JSON data effortlessly, exactly how you need in 3 simple steps.

1

Fill in a form

Head over to www.deltaxml.com/trials and fill in an evaluation request form, letting us know what you're hoping to achieve with the product.

2

Set up the software

We'll get on a call to help guide you through the set-up of the solution. We'll explain the configuration options so you get the most out of your trial.

3

Trial the software

You'll have 14-days, with us supporting you throughout, to experiment with the software within your own projects, products and processes completely free.

COMPARE AND MERGE IN PRACTICE

OUR PRODUCTS ARE USED BY SMES TO GLOBAL ENTERPRISES WORLDWIDE

HIGHLIGHTING CHANGE IN OPERATOR MANUALS

A medical devices manufacturer is using DeltaXML to help customers identify where changes have been made between different versions of their operator manuals.

DeltaXML dramatically reduces the work required by their documentation team to produce detailed summaries of changes. These are included with their product updates and allow clinicians to quickly see how their operating practices may be impacted.

STREAMLINING PHARMACEUTICAL PUBLISHING

A major publisher within the pharmaceutical industry is using DeltaXML to streamline their editorial process and dramatically reduce the work involved in producing the summaries of what's changed since the last edition.

DeltaXML has been integrated into their existing editing tools and workflows so that editors and contributors can instantly see what's been amended, while ignoring superficial changes.

5 STAR SUPPORT

Full email, telephone and service desk support is available to all DeltaXML customers. Our documentation site is full with easy to follow guides and samples.

EXPLORE OUR PRODUCTS

Identifying and managing changes or edits in documents need not be laborious or costly, even when they are essential for compliance, quality or product safety.

DeltaXML is a world leader in developing software tools for change-control and version management. Our tools find, merge, process and synchronise change in XML and JSON data and documents and are used daily throughout the world by governments, banks, aircraft manufacturers, and the defence industry, where 100% accuracy is vital.

When you need to identify changes or recombine differences between complex XML or JSON datasets, visual tools are very time-consuming and error-prone, while custom scripts can become challenging to develop and maintain. Our software is developed specifically to be embedded into your own products or processes so you're left with powerful functionality that looks like what you're used to.

XML Compare

A complete toolkit for reliable XML comparison, finding all the meaningful diffs between any XML file.

XML Merge

A complete toolkit for reliably merging multiple XML documents or datasets into a single file.

DITA Compare

The most efficient and dependable way of finding all of the changes within your DITA content.

DITA Merge

A sophisticated approach for reliably merging multiple DITA documents into a single file.

DocBook Compare

The most efficient and dependable way of finding all of the changes within your DocBook content.
